

## MERCURY 72KW

### Technical Features:

Maximum Pressure: 10BAR

Maximum Temperature: 182°C

Max. Steam Output Dry:

265lb. (120kg)/hour—4.4lb (2kg)/min.

Water Tank Volume: 40lt. PET Internal

Electric Heating Power: 72000Watt

Heating up time: 7minutes

Boiler Material: Stainless Steel AISI 304

Dimensions L x W x H mm: 1000x600x700

Net Weight: 120kg

Length Power cable: 3meter

Standard Accessories: Steam Hose

### Typical application sectors are:

Sterilization / sanitation of large machinery

Part clearing in place of solvents

Multiple belt cleaner installations

Meat / Poultry / Fish industry

Industrial bakeries / Candy / Confectionery

Breweries / Beverages / bottling

Paper & Pulp industry

The Mercury 72Kw is a purpose driven steam generator which we produce and deliver as a product that is tailored to your specific needs.

The many possible applications make it almost mandatory to offer a product as specific as possible instead of offering it as a “do it all” solution that possibly ends up offering much more than you may need or not enough for your needs. For this reason we offer our “built to specification”! You may need just 1 hose and no automation so why ask you to pay more if you don’t need it. On the other side you may want automation and/or 4 individual steam outlets, added wet steam or what ever it takes to give you a solution for your specific requirements. We consider ourselves as a solution provider and you as a customer who deserves more than just an out of the box product.

*Proud to deliver the steam you demand!*
